Work Experience

full stack developer

August 2025 until March 2026 (7 months)

moaserhome

Iran Mashhad

Backend: Developed user and product management APIs using NestJS, TypeORM, and PostgreSQL.

Frontend: Developed a WordPress plugin with React for content management.

Achievements:

Reduced product page load time by 35% through query optimization and lazy loading on the frontend.

Implemented a simple caching system with Redis, reducing API response time from 600ms to 120ms.

backend developer

June 2024 until February 2025 (8 months)

Rojan soft

Iran Mashhad

RojanSoft (Backend Developer - Node.js + Express)

Role: Designed and implemented RESTful APIs using Node.js, Express, and MongoDB.

Achievements:

Built a JWT authentication API capable of handling 500 concurrent requests per second.

Fully documented the API with Swagger, which simplified frontend integration and reduced cross-team coordination time.

frontend developer

June 2023 until September 2023 (3 months)

carencar

Iran Mashhad

CarnCar (Frontend Developer - React)

Role: Developed reusable components using React (no additional libraries like Redux) .

Achievements:

Built a simple admin panel for an internal project, allowing the support team to update content without developer intervention.

frontend developer & IT expert

June 2022 until October 2022 (4 months)

Razavi Architectural Arrays Company

Iran Mashhad

Role: Supported and developed internal modules using HTML, CSS, and vanilla JavaScript.

Achievements:

Designed and implemented 3 data entry forms, reducing employee data registration time by 40%.

Fixed over 20 system bugs across hardware and software sections.

Education

Bachelor: Software engineering

2025 - Present

The Islamic Azad University, Mashhad

NestJs

About Me

I'm Mani, 20 years old. Since I wrote my first line of code two years ago, I've been taking one step closer to the backend world every day. I started with frontend, but I quickly realized where I really want to stay: behind the scenes. Where data comes to life, requests find their way, and APIs quietly do their job. Right now, I'm really comfortable with Node.js and Express. NestJS is helping me think more organized, and PostgreSQL and MongoDB have become my everyday tools. I put it right out there when I don't know something — but sitting down with a problem until it's solved? That, I know how to do. I'm looking for a team where I can put in my energy and get energy back.
